A: Historical Records (Excerpts from 2013 EDR Report)

1.0 Introduction

Rail improvements and capacity expansion to the rail network linking Seattle and Portland were recently completed as part of the federally funded High-Speed Rail (HSR) Program. A significant portion of the HSR improvements occurred in Cowlitz County with the construction of the Kelso to Martin's Bluff Project (KMB). KMB added a third main track, new signal improvements, new railroad bridges, and maintenance access roads. With these Kelso-area rail improvements, existing at-grade crossings at Mill Street and Yew Street within the KMB project area have been identified for removal and replacement with a grade separation.

In anticipation of closing the crossings at Mill and Yew Streets, the City of Kelso completed the City of Kelso Railroad Crossing Study in 2013 that evaluated grade separation options, resulting in the selection of Hazel Street Option 2A as the preferred alternative. Option 2A would revise the Hazel Street alignment just east of the BNSF railroad tracks and construct a new bridged portion of the street to cross over South Pacific Avenue and the tracks at an approximate 90-degree angle; the elevated bridge crossing would be approximately 400 feet in length. Hazel Street would be extended west to intersect with South River Road.

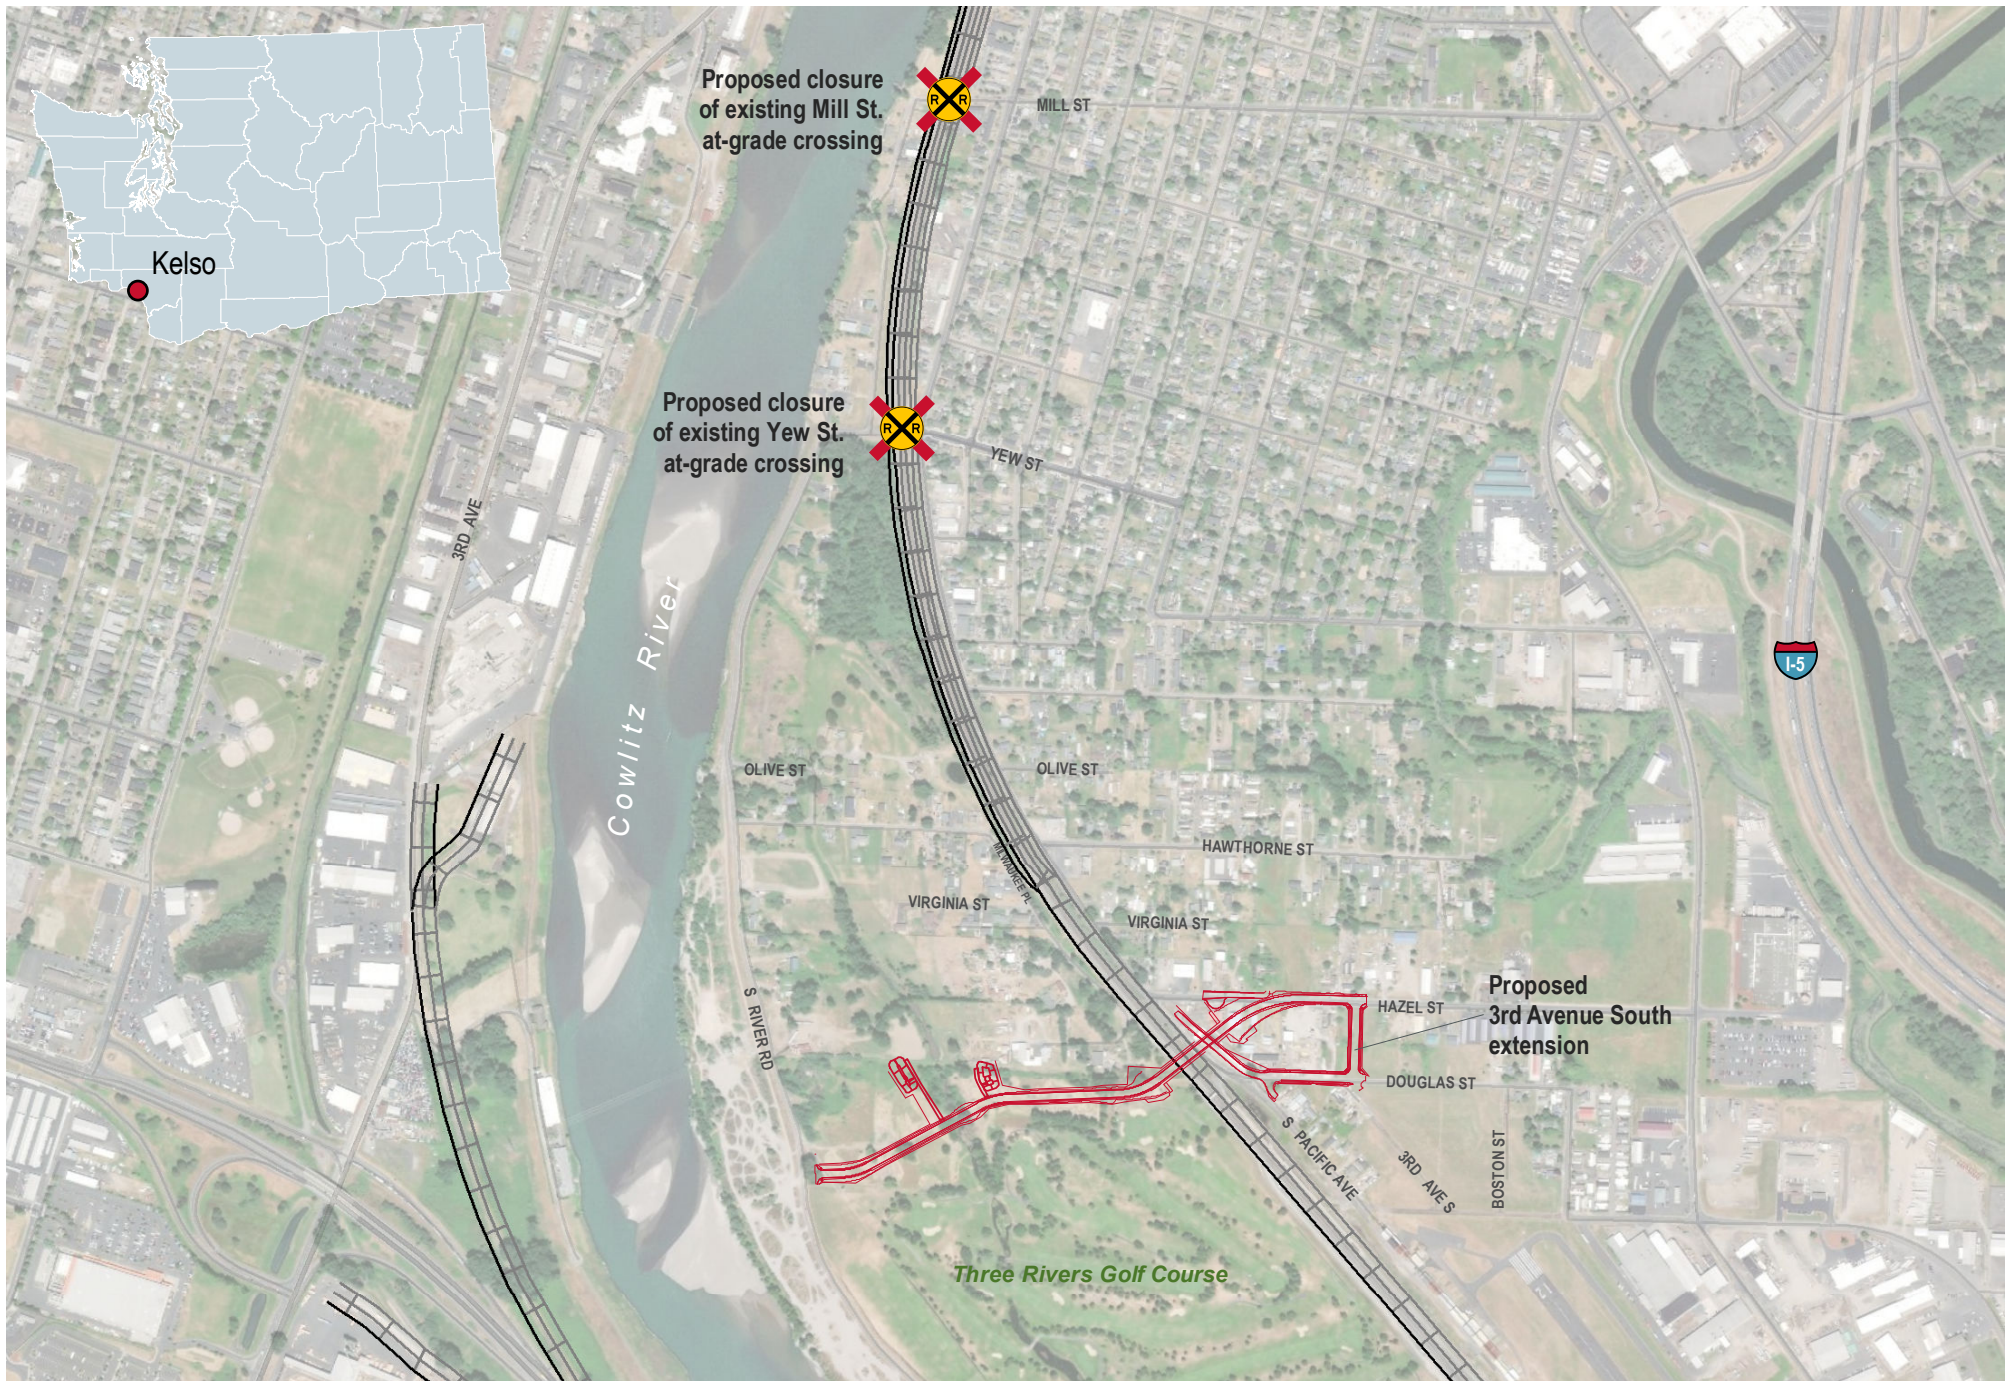

The existing connection between South Pacific Avenue and Hazel Street would be closed, with a new connection provided via Douglas Street and a newly constructed extension of 3rd Avenue South. The Douglas Street and South Pacific Avenue intersection would be improved to accommodate the increased traffic, and Douglas Street would be widened to include bike lanes and sidewalks. The extension and improvement of 3rd Avenue South between Douglas Street and Hazel Street would complete the connection. Improvements to Hazel Street, Douglas Street and 3rd Avenue South will require property acquisition from adjacent landowners. With the construction of the grade separation at Hazel Street complete, the City would move forward with closure of the existing at-grade crossings at Mill and Yew Streets to vehicle traffic. The existing crossing arms would be removed. Access control measures would be installed and cul-de-sacs or hammer heads would be constructed to facilitate vehicle turnaround on the west side of the closed crossings. Figure 1 shows the project location and alignment.

The total length for all segments of the project is approximately 1.0 mile. With funds available in the 2017-19 biennium, the City intends to advance the design and environmental clearance of Option 2A at Hazel Street to be ready to continue design, secure rights-of-way, and construct the project as funding becomes available in future biennia.

This Environmental Site Characterization Report (ESCR) describes potential hazardous materials and contamination within the Project Area to support State Environmental Policy Act compliance. The ESCR includes a review of publically available environmental record sources to obtain information indicating the location of environmental listings, including conditions that have resulted in releases or have the potential for release of hazardous constituents to the environment.

Historical sources, including Sanborn fire insurance maps, topographic maps, aerial photographs, and city directories obtained for the 2014 KMB Environmental Assessment (EA) (HDR 2014), were also reviewed for the project. Geologic literature and topographic maps were reviewed to evaluate local geology and soil types, surface drainage pathways, groundwater depths, and overall groundwater flow direction.

It is important to note that the completion of this review does not (and is not intended to) constitute an ASTM-conforming "Phase I Environmental Site Assessment" as defined in ASTM E 1527-13. No site reconnaissance or interviews were conducted as part of this ESCR, and historical sources produced since the 2014 KMB EA were not reviewed.

- Railway

FIGURE 1
PROJECT AREA

CITY OF KELSO: RAILROAD GRADE SEPARATION

2.0 Site Description and Vicinity Characteristics

The Hazel Street Option 2A “Project Area” consists of portions of Hazel Street and Douglas Street from west of 3rd Avenue South to South Pacific Avenue, commercial and residential properties located between Douglas Street and Hazel Street, the BNSF rail line between Hazel Street and Douglas Street, and undeveloped land in the City and unincorporated Cowlitz County located between the BNSF rail line and South River Road. In addition, residential properties are located near the Mill Street and Yew Street at-grade crossings. Three Rivers Golf Course is adjacent to the Project Area to the south. A Project Area map is included as Figure 1. The topography of the Project Area is generally flat, with an elevation of approximately 15 feet above mean sea level. The Cowlitz River is located approximately 400 feet from the western extent of the Project Area.

2.1 Area Geology and Hydrogeology

The Project Area is located within the Portland Basin, which has been formed by a diversity of volcanic and sedimentary processes to create the topography, bedrock, and soils that characterize the basin (Washington Department of Natural Resources [DNR] 2018). Geologic units in the Project Area are dominated by recent alluvial deposits (deposited within the last 10,000 years) with small outcrops of older basalt formations (from volcanic activity 50 to 30 million years ago).

The United States Department of Agriculture Soil Conservation Service (SCS) classifies the soil units on the Project Area as Arents, 0 to 5 percent slopes; Newberg fine sandy loam, 0 to 3 percent slopes; and Pilchuck loamy fine sand, 0 to 8 percent slopes. Arents soils are moderately well drained with moderately high to high infiltration rates. Newberg fine sandy loam soils are well drained with high infiltration rates. Pilchuck loamy fine sand soils are somewhat excessively well drained with high to very high infiltration rates (USDA 2018).

Depth to groundwater data were not available for the Project Area. However, groundwater is assumed to be relatively shallow, due to the Project Area’s proximity to the Cowlitz River. The groundwater flow direction in the area is assumed to generally be to the west, toward the Cowlitz River.

3.0 Records Review

3.1 Environmental Records Review

HDR utilized the Washington State Department of Ecology’s (Ecology) “What’s In My Neighborhood” search tool (Ecology 2018a), the Ecology Toxics Cleanup Program Web Reporting database (Ecology 2018b), and Ecology’s solid waste listings (Ecology 2018c) to search the following databases to evaluate the potential for hazardous materials contamination with or adjacent to the Project Area:

- Ecology Confirmed and Suspected Contaminated Sites List (CSCSL)
- Ecology Voluntary Cleanup (VCP) and Independent Cleanup (ICP) Lists
- Ecology registered underground storage tanks (UST) list and leaking UST list
- Information on solid waste disposal facilities and landfills.

HDR also reviewed the United States Environmental Protection Agency Resource Conservation and Recovery Act (RCRA) Small Quantity Generator (SQG) and Large Quantity Generator (LQG) database (USEPA 2018).

No listings for the Project Area were included in the searched publically-available databases. The following sites were located near the Project Area:

- P&H Logging Inc., 244 Milwaukee Place (approximately 0.15 mile northwest of the proposed Hazel Street Extension west of the BNSF tracks). The site was listed in the Ecology UST database for three USTs that were closed-in-place as of 1996. The tanks were installed in 1964.
- Cliff Koppe Metals, 1610 South River Road (approximately 0.15 mile southwest from the at-grade closure of Yew Street). The site was listed in the CSCSL. The site is awaiting cleanup due to polychlorinated biphenyls (PCBs), polycyclic aromatic hydrocarbons (PAHs), and petroleum contamination suspected in groundwater above Ecology cleanup levels and confirmed in soil above Ecology clean up levels.
- South Pacific Exxon, 1115 South Pacific Avenue (approximately 0.09 mile southeast of the Mill Street at-grade crossing and 0.20 mile north of the Yew Street at-grade crossing). The site is listed on the VCP list. Ecology granted the site no further action status in 2007. The site is also listed in the Ecology UST database for four USTs that have been removed from the site. The tanks were installed in 1985, with capacities between 5,000 and 20,000 gallons each.
- Kelso, 1205 South Pacific Avenue (approximately 0.17 mile southeast of the Mill Street at-grade crossing and approximately 0.12 mile northwest of the Yew Street at-grade crossing). The site is listed in the ICP list with a no further action granted by Ecology in 2012. Petroleum contamination in soil was remediated below clean-up levels. The site is. The site is also listed in the Ecology database of USTs for five USTs that were removed from the site. The tanks were installed in 1964.

The Environmental Data Resources, Inc. (EDR) database report for the KMB EA (HDR 2014) was also reviewed. The database search was originally conducted on May 25, 2013, and included federal, state, local, and tribal databases. The EDR report included the following listings for the Project Area and surrounding area:

- US Attachments, 211 Hazel Street (Project Area). This site was listed in the FINDS and WA ALLSITES databases. The FINDS database is a pointer to other databases. The ALLSITES database provides information on facilities and sites of interest to Ecology.
- CPS Environmental Group Inc, 339 Hazel Street, (Project Area). The site was listed in the RCRA NonGen/NLR, WA ALLSITES, and WA MANIFEST databases. The WA MANIFEST database contains hazardous waste manifest information. The site does not presently generate hazardous waste, and no violations were found.
- Northwest Natural Stone, 207 Douglas Street (Project Area). The site was listed in the FINDS database.
- P&H Logging Company, Inc. 244 Milwaukee Place (approximately 0.15 mile northwest of the proposed Hazel Street Extension west of the BNSF tracks). The site was listed in the WA ALLSITES, WA UST, and FINDS databases. Additional information about this site obtained from the Ecology and RCRA databases is provided above.

- South Pacific Exxon, 1115 South Pacific Avenue, (approximately 0.09 mile south of the Mill Street at-grade crossing and 0.20 mile north of the Yew Street at-grade crossing). The site was listed in the WA ALLSITES, WA CSCSL NFA, WA VCP, EDR Historical Auto Stat, WA UST, and WA ICR databases. The EDR Historic Auto Stat database contains listings of potential gas station/filling station/service station sites that were identified in selected national collections of business directories available to EDR researchers. The site was listed as a historical auto station for the years 2001, 2002, and 2003. A leaking underground storage tank was reported in 1999. Additional information about this site obtained from the Ecology and RCRA databases was provided above.
- Kelso City Shops, 1205 Pacific South, Kelso, WA (approximately 0.17 mile south of the Mill Street at-grade crossing and approximately 0.12 mile northwest of the Yew Street at-grade crossing). The site was listed in the FINDS, WA ALLSITES, WA CSCSL NFA, WA UST and EDR Historic Auto Stat databases. The site was listed in the EDR Historic Auto Stat database for the years 2001 and 2002. A leaking underground storage tank was reported in 1990. Additional information about this site obtained from the Ecology and RCRA databases is provided above.

3.2 Historical Use Information

The objective of reviewing historical use information is to develop a history of previous land uses in the vicinity of the Project Area, and to assess these uses for potential hazardous materials impacts that may affect the project. HDR reviewed those historical sources that were readily available and reviewable, and likely to provide useful information, given the time and cost constraints inherent in site characterization projects.

3.2.1 Fire Insurance Maps

Fire insurance maps were produced by private fire insurance companies for many decades, to indicate uses of the project site on specified dates for setting fire insurance rates. HDR reviewed fire insurance maps for the 2014 KMB EA from EDR, the copyright holder for the Sanborn map collection. Sanborn maps were reviewed for the following years: 1923, 1949, 1957, and 1961.

- 1923: Residential properties and associated garages and a stable were located near the Mill Street at-grade crossing. The railroad line was present in its current location west of Mill Street. A Standard Oil Company Oil Station, including at least four associated aboveground storage tanks (ASTs) and a pump house, was depicted approximately two blocks south of the Mill Street at-grade crossing near the intersection of Elm Street and 2nd Avenue.
- 1949: A store and residential properties and associated garages were located near the Yew Street at-grade crossing. Additional residences were present near the Mill Street at-grade crossing. The Standard Oil Company site shown on the 1923 map was depicted as a truck and tractor shed. Signal Oil Company Bulk Plant, including at least 5 ASTs and an oil warehouse, was adjacent to the truck and tractor shed to the north. Feed & Implements and Grange Hall was depicted north of Signal Oil Company Bulk plant and included a truck repair building, elevated gas tank, and filling stem. 2nd Avenue South had been renamed to South Pacific Avenue.
- 1957: The area near the Yew Street at-grade was relatively unchanged. The Feed & Implements and Grange Hall depicted on the 1949 map was listed as a filling station and truck and oil storage. Kelso City Shops was located south of the Signal Oil Company along

South Pacific Avenue, at the location of the Standard Oil Company Oil Station and the truck and tractor shed depicted respectively on the 1923 and 1949 maps.

- 1961: The area near the Yew Street at-grade was relatively unchanged. South of the Mill Street at-grade crossing, a fiberglass manufacturing facility and an adjacent auto repair facility occupied the location of the truck and oil storage building that was present on the 1957 map. The gasoline filling station remained on the southern portion of the same parcel. One additional AST was depicted at the Signal Oil Company.

3.2.2 Historical Aerial Photographs

Historical aerial photographs are valuable for the environmental assessor to review features of properties on and near the project site over a long period of time. HDR reviewed historical aerial photographs provided by EDR. Historical aerial photographs were reviewed from the years 1951, 1970, 1991, and 2000.

- 1951: Portions of the Project Area and surrounding area were developed with residential and commercial properties. Hazel Street, South Pacific Avenue, Douglas Street, South River Road, Mill Street, Yew Street, and the BNSF rail line were present in their current locations. Much of the Project Area west of the BNSF rail line was agricultural in nature, with one residential structure present east of South River Road. Structures associated with the Kelso City Shops and Signal Oil Company, located south of the Mill Street at-grade crossing, were present.
- 1970: Additional development had occurred in the Project Area, with structures present near Hazel Street and the BNSF railroad. Additional development had occurred to the east of the Project Area in the surrounding area. A significant number of vehicles were stored on an unpaved parcel along South River Road, north of the Project Area. Vegetation had been removed along the Cowlitz River west of South River Road and several dirt roads along with round ground disturbances or debris piles were present in this area. Structures were present at the location of the Ecology UST database listing for 244 Milwaukee Place. The areas near the Mill and Yew Streets at-grade crossings were relatively unchanged.
- 1991 and 2000: The Project Area was relatively unchanged. Development of the Three Rivers Golf Course had begun south of the Project Area. The vehicles stored on the unpaved parcel north of the Project Area were no longer present in 1999. The structures associated with Kelso City Shops were present.

Publically available aerial photographs from Google Earth, for the years 1990, 1994, 2009, and 2012, were reviewed to determine historical use of the Project Area.

- 1990: Debris was present in the Project Area near the corner of Hazel Street and South Pacific Avenue. The area immediately west of the BNSF railroad was used for vehicle storage. The area south of Douglas Street near South Pacific Avenue was also used for vehicle storage on an unpaved parcel.
- 1994: The debris shown in the 1990 aerial photograph was no longer present in the Project Area near Hazel Street. Vehicle storage continued on the unpaved parcel south of Douglas Street.
- 2009: The structures located in the Project Area east of South River Road had been demolished.

- 2012: Staining was present south of a structure along Hazel Street in the Project Area.

3.2.3 Historical Topographic Maps

Historical topographic maps provide an overview of the area relative to potential previous land uses. HDR reviewed historical topographic maps of the Project Area and surrounding area dated 1943, 1953, 1970, and 1990. These maps served to verify the information gathered in the historical aerial photograph review discussed in Section 3.2.2.

4.0 Conclusions and Recommendations

The Project Area has been developed since the 1920s with commercial and residential properties.

Three listings of concern were noted during the review of publically-available databases:

- 1610 South River Road is listed on the CSCSL and is awaiting cleanup for PCBs, PAHs, and petroleum contamination. The site is located approximately 0.15 mile southwest from the at-grade crossing closure of Yew Street.
- 1115 South Pacific Avenue is listed on the VCP list with a no further action granted to the site by Ecology in 2007. The site is located approximately 0.09 mile southeast of the Mill Street at-grade crossing and 0.20 mile north of the Yew Street at-grade crossing. The site was depicted as Signal Oil Company and Feed and Implements and Grange Hall on the 1949 Sanborn map, as a filling station on the 1957 Sanborn map, and as a fiberglass fabricating and auto repair facility on 1961 Sanborn map. Four USTs were removed from the site.
- 1205 South Pacific Avenue is listed in the ICP list with a no further action granted by Ecology in 2012. The site is located approximately 0.17 southeast of the Mill Street at-grade crossing and approximately 0.12 mile northwest of the Yew Street at-grade crossing. This site is depicted as the Standard Oil Company on the 1923 Sanborn map, a truck and tractor shed on the 1949 and 1957 Sanborn maps, and as Kelso City Shops on the 1961 Sanborn map. Five USTs were removed from the site.

Several areas of debris and vehicle storage were noted during the historical source review. One area of staining was also noted. These activities may have led to unreported releases, which may have affected the Project Area.

HDR recommends that an ASTM-compliant Phase I Environmental Site Assessment (ESA) be conducted for the Project Area prior to property acquisition. An ASTM-conforming Phase I ESA as defined in ASTM Practice E 1527-13 may qualify the User for relief from liabilities based (in part) on completion of All Appropriate Inquiries as defined by the U. S. Environmental Protection Agency (EPA) and the ASTM E 1527-13 standard prior to purchase of a property. Those inquiries are evaluated and documented by completing the Phase I ESA process.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/05/2013 has revealed that there is

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there are 2 HIST FTTS sites within the searched area.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 10/23/2011 has revealed that there are 49 FINDS sites within the searched area.

STATE AND LOCAL RECORDS

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 01/22/2013 has revealed that there are 6 WA CSCSL sites within the searched area.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 01/22/2013 has revealed that there are 8 WA CSCSL NFA sites within the searched area.

EXECUTIVE SUMMARY

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the CA HAZNET list, as provided by EDR, has revealed that there is 1 CA HAZNET site within the searched area.

EXECUTIVE SUMMARY

EDR PROPRIETARY RECORDS

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 15 EDR US Hist Auto Stat sites within the searched area.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there is 1 EDR US Hist Cleaners site within the searched area.

 Report Title: Second Quarter 2001

Date Ecology Received Report: 10/09/96
 Contaminants Found at Site: Petroleum products
 Media Contaminated: Groundwater, Soil
 Waste Management: Tank
 Region: South Western
 Type of Report Ecology Received: Interim cleanup report
 Site Register Issue: 94-38
 County Code: 8
 Contact: Not reported
 Report Title: Not reported

Tank Overfill Prevention: Automatic Shutoff (fill pipe)
 Tank Material: Fiberglass Reinforced Plastic
 Tank Construction: Single Wall Tank
 Tank Tightness Test: Annual
 Tank Corrosion Protection: Corrosion Resistant
 Tank Manifold: Not reported
 Tank Release Detection: Manual Inventory Control (daily)
 Tank SFC Type: Not reported
 Pipe Material: Fiberglass
 Pipe Construction: Single Wall Pipe
 Pipe Primary Release Detection: Vapor Monitoring
 Pipe Second Release Detection: Not reported
 Pipe Corrosion Protection: Corrosion Resistant
 Pipe Pumping System: Non-Safe Suction (Ta)
 Tag Number: A4566
 Responsible Unit: SOUTHWEST
 Capacity Range: 5,000 to 9,999 Gallons
 Dispencer/Pump SFC Type: Not reported

Tank Name: 2
 Tank Upgrade Date: 11/24/1998
 Tank Install Date: 00/01/1982
 Tank Status: Removed

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
 Mixed waste (haz. and radioactive): No
 Recycler of hazardous waste: No
 Transporter of hazardous waste: No
 Treater, storer or disposer of HW: No
 Underground injection activity: No
 On-site burner exemption: No
 Furnace exemption: No
 Used oil fuel burner: No
 Used oil processor: No
 User oil refiner: No
 Used oil fuel marketer to burner: No
 Used oil Specification marketer: No
 Used oil transfer facility: No
 Used oil transporter: No

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

 Environmental Interest/Information System
 SDWIS [WS] (Safe Drinking Water Information System (Water System)).
 Water Systems can have one or more water system facilities. The water
 system will purchase water from several facilities. Drinking water
 information is stored in EPA's SDWIS, which contains information about
 public water systems and their violations of EPA's regulations for
 safe drinking water. These statutes and accompanying regulations
 establish maximum contaminant levels (MCL), treatment techniques, and
 monitoring and reporting requirements to ensure that water provided to
 customers is safe for human consumption.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Environmental Interest/Information System
 Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 02/01/2013	Source: EPA
Date Data Arrived at EDR: 03/01/2013	Telephone: N/A
Date Made Active in Reports: 03/13/2013	Last EDR Contact: 03/01/2013
Number of Days to Update: 12	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

	Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/04/2013	Source: EPA
Date Data Arrived at EDR: 03/01/2013	Telephone: 703-412-9810
Date Made Active in Reports: 03/13/2013	Last EDR Contact: 03/01/2013
Number of Days to Update: 12	Next Scheduled EDR Contact: 06/10/2013
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

	Data Release Frequency: Quarterly

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

STATE AND LOCAL RECORDS

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 01/22/2013	Source: Department of Ecology
Date Data Arrived at EDR: 01/24/2013	Telephone: 360-407-7200

CSCSL NFA: Confirmed and Contaminated Sites - No Further Action

The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

Date of Government Version: 01/22/2013	Source: Department of Ecology
Date Data Arrived at EDR: 01/24/2013	Telephone: 360-407-7170

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR PROPRIETARY RECORDS

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A	Source: EDR, Inc.
Date Data Arrived at EDR: N/A	Telephone: N/A

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

	Data Release Frequency: Semi-Annually

TACOMA/PIERCE COUNTY:

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services

Telephone: 253-383-1735

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EDR Historical Topographic Map Report

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.
